

# JIANWEN SONG

Phone: (+86)15528060815  $\diamond$  Email: jianwensong6@gmail.com

Homepage: <https://jianwensong.github.io/>

Address: No.24 South Section 1, Yihuan Road, Chengdu , China, 610065

## EDUCATION

---

### Sichuan University

*Sep. 2017 - Present*

Master of Science in engineering, Detection Technology and Automation Equipment

GPA: 90.4/100 (3.8/4.0)

Supervisor: Kai Liu

### Sichuan University

*Sep. 2013 - Jun. 2017*

Bachelor of Engineering, Electronic Information Engineering

GPA: 85.42/100 (3.38/4.0)

Supervisor: Wei Wu

## RESEARCH INTERESTS

---

My research interests focus on 3D vision, point cloud processing, and image processing. I am dedicated to designing a coding-decoding scheme of structured light illumination to achieve fast and high-precision 3D reconstruction. Recently, I am also trying to apply deep learning to structured light illumination.

## PUBLICATIONS

## PATENTS

---

- Kai Liu, **Jianwen Song**, Jiang Wang, and Yiguang Liu, "Customized projector and projection method based on one-dimensional information", Chinese Patent, CN105737761B.
- Kai Liu, **Jianwen Song**, and Han Zhang, "System calibration method, device, and three-dimensional reconstruction system ", Chinese Patent, CN107170010A. [Patent pending]
- Kai Liu, **Jianwen Song**, Ziyang Hu, and Bin Xu, "Phase unwrapping method, device and electronic instrument based on two-dimensional look-up table ", Chinese Patent, CN110006365A. [Patent pending]

## PROJECTS

---

- Fast and high-precision 3D shape measurement system using surface structure light, supported by Chengdu Zhongliang Electronic Technology Corporation *Jun. 2019*
  - Build the whole system and design the operation interface programmed by C++.
- Low-cost and fast structured light 3D imaging for product examination in high-end manufacturing, supported by Science and Technology Support Program of Chengdu City *Sep. 2018 - Present*
  - Study different kinds of coding schemes in structured light illumination and compare their accuracy and efficiency.
- High-precision structured light 3D imaging for pressure vessel and pipeline deformation corrosion detection, supported by Science and Technology Support of Sichuan University and Zigong City Cooperation Project *Sep. 2018 - Present*
  - Design a high-accuracy and efficient phase unwrapping algorithm for structured light illumination.
- Inexpensive real-time high-precision multi-frame structured light 3D face imaging, supported by Beijing Baidu Network Technology Corporation *May. 2018 - Apr. 2019*
  - Design a universal decoding method that can be applied to different coding schemes of structured light illumination.
- High-precision structured light 3D imaging for high-reflective aero-engine blades, supported by Science and Technology Support Program of Sichuan Province *Jan. 2018 - Present*
  - Design an algorithm that can detect the light saturation area in structured light system.
- High-precision structured light 3D imaging for illumination saturation overflow and multipath effects, supported by the National Natural Science Foundation of China *Sep. 2017 - Dec. 2018*
  - Study the influence of point spread function on structured light system.
- Pipeline analysis system, supported by Seikowave Corporation *Jun. 2017 - Sep. 2018*
  - Fit the rotation parameter of given pipeline point clouds by using Hough transform.

## HONORS AND AWARDS

---

- National Scholarship for Postgraduate Student *Nov. 2018*
- Outstanding Postgraduate Student of Sichuan University *Nov. 2018*
- 1<sup>st</sup> Prize, Postgraduate Academic Scholarship of Sichuan University *Sep. 2017*
- Outstanding Undergraduate Thesis of Sichuan University *Jun. 2017*
- Outstanding Undergraduate Student of Sichuan University *Oct. 2016 and Oct. 2014*
- 3<sup>rd</sup> Prize, Scholarship of Sichuan University *Oct. 2016 and Oct. 2014*
- 1<sup>st</sup> Prize, Ship Model Competition of Sichuan University *Apr. 2014*

## SKILLS

---

Languages: MATLAB, C/C++, Python

Toolkits: L<sup>A</sup>T<sub>E</sub>X, OpenCV, PCL, PyTorch, TensorFlow, Linux, etc.
